SUMMARY

Full Stack Developer with experience in **JavaScript, React, Python, and SQL**. Passionate about building efficient web applications and tackling technical challenges. Enjoys collaborating with teams and always strives to improve with every project.

PROJECTS

Smokeless

2024

<https://github.com/cristiann05/Smokeless>

Smokeless is an application designed to help people quit smoking, offering a personalized experience with the following features:

- Full CRUD for Users and Coaches:** Allows creating, reading, updating, and deleting users and coaches. Implemented with **Flask, SQLAlchemy, and JWT** for authentication.
- Personalized Tracking:** Users can send requests to coaches and check their status. Developed with **Flask and JWT** for session management and security.
- Connection with Specialized Coaches:** Enables real-time messaging between users and coaches via a **REST API**.
- Daily Tips:** Generates personalized daily recommendations to help users stay focused. Implemented using the **OpenAI API**.
- Progress Visualization:** Displays user progress with interactive charts, using **React and Tailwind CSS** for an attractive and responsive interface.

Wander

2024

<https://github.com/cristiann05/Wander-front>

Wander is a web application that connects users with unique travel experiences through a modern and intuitive interface.

- Modern and Responsive UI:** Developed dynamic interfaces with **React, TypeScript, and Tailwind CSS**, focused on user experience.
- Scalable Frontend:** Project setup with **Vite** following best practices for structure and type safety.
- REST API Integration:** Frontend prepared to consume dynamic data from backend services.
- Team Collaboration:** Actively worked in an agile team with weekly meetings (**weeklies**) to stay aligned on goals.

EXPERIENCE

Front-End Developer

ChatWith

12/2024 - 02/2025 Remote

- Created and customized websites for businesses using existing templates.
- Modified design and content using **HTML, CSS, and JavaScript**.
- Integrated **WhatsApp buttons and contact widgets** to improve client communication.
- Adjusted and configured options and content directly on the websites according to client needs.
